

CLAY COUNTY CLEAN INDOOR AIR REGULATION

Sec. 1000. TITLE

This Regulation shall be known as the Clay County Clean Indoor Air Regulation of 2005

Sec. 1001. FINDINGS and PURPOSE

The Clay County Board of Health does hereby generally accept that:

The United States Surgeon General has determined that involuntary inhalation of tobacco smoke is (a) a cause of numerous diseases in health of nonsmokers' and (b) a major contributor to indoor air pollution; and (c) that children, elderly people, and individuals with cardiovascular and/or respiratory diseases are at special risk.

The Environmental Protection Agency (EPA) has classified secondhand smoke as a Group A Carcinogen, known to cause cancer in humans. Accordingly, the Clay County Board of Health finds and declares that the purpose of this Regulation is to (1) protect the public health and welfare by prohibiting smoking in enclosed public places and by regulating smoking in places of employment and (2) recognize that where the need to breathe smoke-free air conflicts with the desire to smoke, the need to breathe smoke-free air shall have priority.

In attempting to minimize the effects of tobacco smoke on the general public in enclosed public places, the regulations of [boards of health] address a serious health issue which the Legislature has recognized.... Based upon the foregoing observations, we find that clean indoor air regulations of local boards of health that place restrictions on smoking in enclosed public places (1) are consistent with the findings of the Legislature "that smoking may cause lung cancer, heart disease, emphysema and other serious health problems," (2) advance the legislatively prescribed public policy "to provide the state with a citizenry free from the use of tobacco," and (3) fall within the bounds of authority granted by the Legislature to such boards....." Excerpted from the December 2, 2003 WV Supreme Court Decision #31120.
